Imagine being warm this winter...

install Hydronic Heating

...never be cold again

Hydronic Heating is the most efficient form of central heating available.

It is the process of conveying heat via hot water through pipe work and releasing silent, gentle, hygienic radiant heat to your home.

Heat is released through natural convection and radiant heat without resulting in dry air or dust.

Radiators are safe to touch and come in different shapes and sizes to suit your decor.

Benefits of Hydronic Heating

Quiet and Efficient
Hydronic heating operates silently. Warmth is transferred through natural convection and radiant heat delivered via radiators or underfloor heating.

Breathe Easy
Perfect for asthma and allergy sufferers, Hydronic heating doesn't require fans to move heat, so dust and airborne pathogens are minimised.

Stay Warm for Longer
Hydronic heating warms the things in the room, making your home stay warm for longer.

Environmentally Sustainable
Hydronic heating systems are the most efficient form of central heating available. They can be heated using a range of different heat sources.

There are times in our life when we can feel stuck, overwhelmed, frustrated and generally unhappy with our life.

Margaret Thompson is a professional counsellor with a wealth of experience. She has a Master's Degree in counselling from the University of Tasmania, a postgraduate certificate in counselling, a diploma in counselling, a diploma in business, and a diploma in business administration from the University of Tasmania.

Her career spans over 20 years, where she has worked in various roles in counselling, education and research. She has also worked in human resources, health, and community care, and is a member of the Royal College of Nursing.

Margaret enjoys helping individuals, couples, and organisations, and is available to provide support and guidance.

TARRALEAH

The Lodge TARRALEAH

wilderness lakes, mountain vistas, ancient forests...
immerse yourself in Tasmania's highlands

Built on an elevated Highland plateau, first scouted by pioneers at the turn of the 20th Century, The Lodge sits high on a ridge overlooking the Tasmanian wilderness. A comfortably paced two hour scenic drive from Hobart, Devonport or Launceston and on the renowned Hobart - Strahan touring route, voted 'One of Australia's Top Ten Drives'.

The Lodge was originally built in the 1930s, in an Art Deco style, to house the cream of Tasmania's pioneering hydro electricity officers and gentlemen. The guest book featured the powerful and famous and if you have the time to listen, has hosted more than its share of the risqué!

At Tarraleah, the walls of wilderness part for views that encompass river, hills and heavily wooded valleys far below. Mount Wellington looms in the distance and the site is host to an enormous range of Tasmanian flora and fauna.

There are some fantastic walks on the Estate and it is quite possible to see platypus, quolls, wallabies, wombats, Tasmanian devils and echidnas all in the same evening. Over 80 bird species and eagles can be seen soaring as you sit in the stunning cliff top hot tub. Some say the Tasmanian tiger is also about and one of our engaging wilderness guides is credited with the last reputable sighting in Tasmania.

Lake St Clair and Lake King William are close at hand and offer very different scenery. The Lodge is about an hour's drive to Lake Gordon and within touring distance of Strahan, Queenstown and the majority of the Highland lakes.

We hope to have the pleasure of your company soon...

Lodge B&B Special \$285
per couple, per night

For those just looking for beautiful accommodation in an extraordinary location we've put together our Lodge B&B special just for you.

The Lodge package includes accommodation, breakfast and a soak in the cliff-top spa but the chef and butler get the night off. Dinner is not included but we can highly recommend the local Highlander Arms with their modern bistro style menu, and an excellent range of good local and imported wines.
